Clearing Browser Cache

What is Browser Cache and why should it be cleared regularly?

Any time you visit a website, you are accessing hundreds if not thousands of files. Your browser will "cache" or store portions of those files to help speed up the loading process for the next time you visit the site in order to cut down page load time.

Many times webpages or sites (e.g. Blackboard) you access have updates that are deployed. If a site has a changed file that your browser has cached, it's going to keep serving the old, cached version of the file and you won't see the most recent changes. This is when, you may encounter browser errors like buttons missing on the page, courses or content missing, inability to submit assignments, create forums or threads, view grade center history, etc.

Clearing the Cache and Cookies in a browser helps fix these issues.

Clearing Cache in Chrome: Windows (PC)

1. In Google Chrome, you need to go into the History Menu. To do that, on the top righthand corner, look for the button with 3 dots, click on that and in the menu that appears click on **History**, then click **History** again.

2. In the new window that opens, on the right you will click on Clear Browsing Data.
