The following slides were adapted from the original presentation for this online report to document major college accomplishments during the 2009/2010 academic year.
Accomplishments 2009/2010

• **Structure**
  • Reorganized Dean’s Office
    • Associate Deans
      • Undergraduate Studies and Community Affairs
      • Graduate Studies and Research
  • Collegiate Directors
    • Student Services
    • Communication and Recruitment
  • Executive Assistant to the Dean
Accomplishments 2009/2010

• Academics
  • Strategically closed four programs:
    • Administrative and superintendent certification, Aural Habilitation, Clinical Laboratory Sciences, and Human Services
  • Graduated first class of Doctor of Physical Therapy (DPT) students
  • Reduced faculty teaching load across-the-board to facilitate research activity
  • Recruited a diverse group of four tenure-track faculty members
Accomplishments 2009/2010

• Budget
  • Realigned fiscal and human resources to accommodate two 3% budget cuts

• Vision
  • Articulated new vision based on:
    1. ENHP’s mission and professional core
    2. translational research paradigm
    3. anchor partners in the community
ENHP’s Identity through its Mission

ENHP provides a scholarly environment where we prepare professionals to teach, promote well-being, and become leaders in local, national and global communities.
ENHP will become a national model for integrating education and health science with community engagement.

Integration to be achieved by an Institute for Translational Research.
1. ENHP’s Mission and Professional Core
2. The Proposed Institute for Translational Research

The institute and centers were unanimously approved by the college faculty in March, 2010, and subsequently approved by the University in May, 2010.
3. A Need for Anchor Partners in the Community

- Educational institutions or systems
- Health care providers
- Policy-oriented partners

Diagram showing the integration of education, health care, and policy within the community.
Achieving the Vision through Translational Research

ENHP will become a national model for integrating education and health science with community engagement.
Strategically into 2010/2011

ENHP will become a national model for integrating education and health science with community engagement

- Attract external grants and gifts to the institute
- Identify anchor partners in the community
- Complete national accreditations
excellence through relevance
